

Armada 1 Energy Dissipator

The Energy Dissipator special weapon of the game [Star Trek: Armada](#) does exactly what the name suggests, draining the targeted ships of their special weapon energy. It is researched at the [Gre'thor Armory](#). When used, it automatically picks four targets of the surrounding opposing ships. Their special energy is being drained steadily (not all at once). It looks like this:

Property	Value
Range	400
Build Time	140 s
Supply Cost	10 (4.3/min)
Dilithium Cost	650 (4.6/s)

The Energy Dissipator also targets cloaked ships, decloaking them on impact.

An active [Corbomite Reflector](#) has no effect on this special weapon. Neither does the [Shield Remodulation](#). The [Phase Cloak](#) will protect against it.
