

Star Trek: Armada Stations

All ships in *Star Trek: Armada* are produced by some sort of station. In general, the stations of the different factions are pretty much the same. They may differ in stats but their roles are exactly the same. Only the buildings for the **super weapons** differ in their functionality. For example, all sensor stations come with a **Tachyon Detection Grid** (might have to be researched first), all torpedo stations only fire torpedoes, all mining stations have the same processing speed, etc..
