

7 Zip

Compression programs are nothing special by themselves. But 7Zip is a free file compression program. It is based on an OpenSource algorithm and as a program itself is also OpenSource. At the same time it has one of the best compression rates. In my opinion best conditions, as format of choice... You can get it [here](#) or alternatively locally from [here](#) (32 bit) or [here](#) (64 bit).

Of course, you can also use WinRAR, but this way you save stupid nag screens or license plays and still have the full range of functions.
